

Course title:	Biodiversities				Code:
Field of study:	Tourism and recreation				Year/Semester: II cycle, 1/1
Specialization:	all				Modes: F/E
Number of hours / semester 30/24					ECTS credits: 4
Lectures: 15/8	Classes: 15/16	Laboratories:	Projects:	Seminars:	

Name of lecturer: Wanda Pańczuk

e-mail: bratek21@vp.pl

Department: Hotel Management and Catering Industry

e-mail: wshig@wshig.poznan.pl

Course position in the study programme:

- field course

Objectives:

- to get to know a wide variety of plant and animal raw materials
- to collect information on the species they are gained from
- to get to know the geographic location and ecological conditions of the species used in economy
- to understand the sense of species, genetic and ecological variety maintaining
- to get to know threats for selected species and ecosystems as well as methods of counteracting this process
- the ability to use knowledge of biodiversities in economic activities

Course contents:

1. Introduction to biodiversity issues:
 - the essence and meaning of biodiversities
 - the protection of biological variety
 - biodiversity of taste and smell
2. Mushrooms (fungi):
 - systematization and ecology
 - nutritional and taste values

- economic utilization of mushrooms
- the protection of dying out species

3. Plant raw materials:

- bulb and root plants
- vegetables
- fruit
- crops
- spice plants

4. A description of selected species from which plant raw materials are gained:

- the species morphology
- the natural occurrence and cultivation
- economic utilization

5. Raw material biodiversities:

- meat
- milk and its products

Theoretical introduction to every unit has a form of a lecture. Moreover, within the confines of classes students get to know detailed issues which record and extend knowledge gained during lectures.

Classes comprise:

- theoretical materials: atlases, Xerox copies, DVDs, magazines
- practical materials: collections of plant and animal raw materials and their products

The course is carried out in winter and summer semesters. The winter semester comprises subjects 1-3 and the winter semester - subjects 4 and 5.

Knowledge of biodiversities is improved by papers, students have a chance to choose subject independently, according to their interests.

Teaching methods: lectures, papers

Assessment methods: written quizzes, paper, individual tasks, oral verification of knowledge
